LASER PACKAGES

BBL (Broad Band Light Photorejuvenation)

Broad Band Light (BBL) Photorejuvenation, is an excellent modality to treat uneven skin tone, diffuse redness and fine spider veins in a safe and effective manner. Photorejuvenation, a no down time procedure, treats the needed areas while leaving the surrounding tissues intact. The pigmented spots turn dark and slough off after a few days. This results in smoother, healthier, younger-looking skin. Photorejuvenation can be performed in 20 minutes but erases years of sun damage. Three to five treatments are necessary for optimal results.

Face (Reg \$350)	\$250	_____	_____
Neck (Reg \$200)	\$150	_____	_____
Chest (Reg \$350)	\$170	_____	_____
Face/Neck (Reg \$500)	\$400	_____	_____
Face/Neck/Chest (Reg \$750)	\$600	_____	_____

Fotofacial (\$650 for face and neck) \$450 _____

The Fotofacial™ plus Skin Tyte is a series of treatments combining Scitons Broad Band Light (BBL) therapy and Skin Tyte. BBL alone helps reduce the signs of photodamage such as brown spots and spider veins, but combining with the Skin Tyte treatment we are significantly reducing fine lines and wrinkles and improving skin texture. The results are dramatic! After a series of 3-5 treatments you will have visibly smoother, firmer and brighter skin.

Laser Packages

You Say You Want a Youth Evolution?

Evolutionize your skin with our Evolve Laser Treatment options. Face it, you didn't get your wrinkles, sun damage, broken capillaries, dull, uneven skin tone overnight - if you want true results it will take more than one night to change your appearance.

Evolution Level 1 Reg \$650 Special \$495

Profractional Lite + Broad Band Light (BBL) photorejuvenation, is an excellent modality to treat uneven skin tone, diffuse redness and fine spider veins in a safe and effective manner. Photorejuvenation, a no down time procedure, treats the needed areas while leaving the surrounding tissues intact. The pigmented spots turn dark and fall off after a few days. This results in smoother, healthier, younger-looking skin. While typically performed on the face, photo rejuvenation can also treat the neck, chest and hands. The ProFractional laser uses tiny laser beams to treat thousands of pinpoint areas of your skin. This stimulates a more robust wound healing response and therefore more collagen formation resulting in smoother, tighter, and healthier skin. Perfect for mild to moderate sun damage. **Quantity** _____
